Lab 3 File Structures

This lab consisted of making a local file system and further making index.html files for our structure and lab 3.

Challenges

This lab was partially challenging and confusing, yet we quickly figured out that we already had the file structure preset in our Art101 folder with all the necessary websites attached.

Results

This website is the result (of our hard labour)!

About us:

My name is Eloise and I'm currently a 2nd year art major at UCSC. I'm originally from LA but I'm currently living in Santa Cruz. I love to listen to music and hang out with my friends.

My name is Ashwin and I'm a junior AGPM major and Literature minor. I'm living on campus in Santa Cruz and so grateful for it. I would love to meet new people in this class! I'm currently learning to play the piano and some of my other hobbies include singing and songwriting.

Summary of efforts:

This lab was not too complicated yet with malfunctioning from our program and the computer, we had to restart midway. We worked very well together and were able to problem solve quickly referring to the internet and previous labs.
